Projects

CampusConnect (Backend Using Nodejs, MongoDB & Express)

Developed "Campus Connect," a robust social media web application backend using Node.js, MongoDB, and Express. Implemented RESTful APIs for user authentication, post creation, and interaction functionalities. Ensured efficient data handling and scalability, optimizing performance for seamless user experience on a dynamic platform.

Vlogging Web App (Backend Using Nodejs, MongoDB & Express)

Designed and implemented the backend for a vlogging app using Node.js, MongoDB, and Express. Developed RESTful APIs to manage user profiles, video uploads, and interactions. Integrated MongoDB for scalable data storage and retrieval, ensuring fast and reliable performance. Implemented authentication and authorization mechanisms to secure user data and enhance platform reliability.

My Contact Web-App (Backend Using Nodejs, MongoDB & Express)

Created the backend for "My Contact," a web application for managing contacts, using Node.js, MongoDB, and Express. Developed RESTful APIs to handle CRUD operations for contacts, ensuring seamless data management. Implemented MongoDB for efficient storage and retrieval of contact information. Designed authentication features to secure user data and enhance privacy.

Education

Vellore Institute of Technology (On Going)- Masters In Computers Application

Trinity Institute of Innovations in Professional Studies— GGSIPU

-Bachelor of Computer Application: CGPA- 8.85

Jagran Public School, Noida

- 2020– Class XII: Percentage- 78%

- 2018– Class X: CGPA- 68.2%

Technical Skills

- Nodejs Mongoddb(NoSQL) Expressjs
 - Java Python SQL
-

Hobbies

- Cricket
- Music
